PREFACE

Chen-chiang is located in south central Kiang-su Province (Nanking Military Region) on the south bank of the Yangtze River approximately 40 nm downstream from Nan-ching (Nanking).

The 81st Infantry Division of the 27th Chinese Communist Army is reported to be located in the Chen-chiang area (see Document Reference 1). The military installations which are included within this report consist of four major areas located at distances of 1 - 13 nm southwest and south-east of Chen-chiang (see Figure 2). The primary purpose of this report is to analyze the physical components of each of these installations and to identify the vehicles and equipment within them.

Photography [redacted] was utilized for the graphic presentations; however, photography of both earlier and later missions was utilized in the preparation of the textual analysis.

Building dimensions are only given for the tank/assault-gun storage and maintenance facility. All measurements are approximate, as obliquity precludes accurate mensuration.

The following Bombing Encyclopedia designations are used in this report to identify the individual military installations.

I. GENERAL

This installation is located approximately 13 nm southwest of Chen-chiang on the main road to Chu-jung. The entire complex consists of a large barracks area (see Figure 3) and a probable tank/assault-gun storage and maintenance facility (see Figures 3 and 4).

Extensive ground scarring indicates a high degree of activity within the area, especially in the tracked-vehicle driver-training area.

No evidence of construction is observed. Four probable tanks/assault-guns were observed on [ ] coverage (see Figure 4).
